

TreePlotter INVENTORY vs. TreePlotter JOBS

Both TreePlotter INVENTORY and TreePlotter JOBS can be used to plot trees and manage tree work, but there are several key distinctions. INVENTORY is our swiss army knife software, capable of a wide range of functions and is used by public, private, and nonprofit clients. JOBS was built specifically for residential-focused tree care companies. Check out the comparison below to determine which tool is best suited to your company's needs.

	 TreePlotter INVENTORY	 TreePlotter JOBS
Best For	Tree care companies with 3+ crews, large-scale landscape contracts, sizable tree inventory projects, or consulting arborists	Tree care companies with 1-3 crews, primarily focused on residential clients
Overview	<u>INVENTORY</u> is a flexible tool for capturing tree and asset information in the field and managing that data with customizable maps, analysis, and reports. INVENTORY is great for managing large tree data sets, guiding multi-year management plans, and streamlining teams with customizable user roles.	<u>JOBS</u> is a map-centric estimation, scheduling, and work order software built to help tree care companies advance their operations past pen and paper or simple spreadsheets. JOBS boosts operational efficiency and helps companies stand out from the competition with modern, interactive estimates and invoices.
Cost	Starts at \$2,000/year	\$200/month or \$2,000/year
